EDUCATION

Purdue University, College of Engineering
Bachelor of Science, Mechanical Engineering

Expected May 2028

PROFESSIONAL EXPERIENCE

Tessell

San Ramon, CA

AI Intern

April 2026 - June 2026

- Built a data analysis tool using Python, pandas, SQLite, scikit-learn, and Streamlit to help review system performance data.
- Developed anomaly detection model with Isolation Forest to identify unusual patterns in CPU, memory, disk, and network data.
- Created project documentation and presentation materials explaining the AI workflow, data pipeline, and user interface.

SciFin – Stealth AI Startup

San Jose, CA

Software Engineering Intern

June 2025 - August 2025

- Built synthetic datasets using Go to test product features connected to Salesforce, helping validate system performance and accuracy.
- Worked closely with startup engineers to debug features, test tools, and write Python scripts supporting AI/ML-related product tasks.
- Used Monday.com to track tasks, share updates, and present project results during team meetings.

Purdue University EPICS Program

West Lafayette, IN

Design Lead

August 2025 - May 2026

- Applied user-centered engineering design to develop an accessible instrument tuner for blind and visually impaired students.
- Led mechanical design using SolidWorks CAD, 3D printing, and C++ while coordinating a 6-member student design team.
- Presented the project at Purdue's Student Innovation & Excellence Showcase and to ISBVI, explaining the design process, prototype, and impact.

USPTO

San Ramon, CA

REST (Robotic Essential Surgical Technologist) - Inventor & Patent Holder

January 2023 - Present

- Invented and patented a robotic system to automate surgical tool sterilization and handling in operating rooms.
- Developed mechanical design concepts for tool storage, sterilization flow, and automated handling using CAD and robotics principles.
- Designed CAD prototypes, wrote a 17-page research paper, published in the Young Inventors Journal, and currently pitching to investors.

Dublin Robotics Club

San Ramon, CA

Competition Engineering & Programming Mentor

August 2022 - March 2025

- Mentored students in robot design, CAD, sensor integration, autonomous programming, and VEX strategy, helping 14 teams qualify for the World Championship.
- Helped organize robotics competitions, manage team logistics, and coordinate students, mentors, and event schedules.

LEADERSHIP AND RECOGNITION

- **VEX VRC & VEX AI Robotics Captain:** Led a 14-member team; ranked **Top 5 nationally and Top 12 worldwide**; won 20+ Excellence, Design, and Tournament awards.
- **Founder, Drone Education Foundation:** Taught drones, robotics, and AI to 410+ students worldwide and raised \$950+ for educational programs.

VOLUNTEER EXPERIENCE

- Earned **3 Gold Presidential Volunteer Service Awards** for mentoring 920+ students in robotics and AI through Dublin Robotics Club and The STEAM Foundation.
- Built donation website for Shree Sheetal Dham Temple, helping raise \$5,000+ for community events.

RELEVANT SKILLS

C/C++ | Go | Python | CAD (SolidWorks, Fusion 360, Inventor) | CNC Mill | 3D Printer Operation | Sensors/Vision | PID Control | Autonomous Path Planning | Technical Presentation & Documentation

ADDITIONAL EXPERIENCE

UC Berkeley M.E.T. Innovation Academy (Jul 2023): Pitched R.E.S.T. and secured a mock \$250,000 investment for 7.5% equity at UC Berkeley SkyDeck.
